**Integrated Energy Therapy®** is the next generation "hands-on" energy healing system. Integrated Energy Therapy (IET) actively clears energy blocks, imprints and cellular memory from the emotional layer of the human energy field that are connected to physical and emotional trauma. IET allows us to release our emotional history without reliving the original trauma. With IET we begin to release the past, live in the present and align with our soul's purpose. By focusing angelic energy through loving touch, we release our suppressed cellular memories and transform our lives.
